PROFILE SUMMARY

Aspiring software developer actively learning and developing skills in modern web technologies including JavaScript (ReactJS/Redux), HTML, CSS, TypeScript, and .NET Core. Currently part of an early career development program, gaining hands-on experience in responsive design, RESTful APIs, and cloud deployment with Azure. Passionate about building efficient and scalable applications while contributing to open-source projects. Eager to continue learning and growing within a dynamic team environment, with a focus on leadership development and career growth through mentorship and internships.

PROJECTS

Astro Motion Website Template:

- Astro Motion is a responsive one-page website template designed for showcasing content dynamically with a smooth motion effect. The template features different sections for navigation, content display, and user interaction.
- Project link: <https://naresh043.github.io/CSS-project-Astro/>

Books Website

- The "Books" website is a dynamic, responsive template built with HTML and Bootstrap. It features a modern navigation bar, interactive sections for showcasing courses, pricing, and testimonials, along with purchasing options for various book formats. The design is clean and mobile-friendly, enhancing user engagement and accessibility across devices.
